

School Attendance Approval Certificate (Chiba City Version)

Revised April 2019

School Name: _____ Student Name: _____

Year-Class: _____ Certificate Date: ____ / ____ / ____ (YYYY/MM/DD)

I certify that the child above is being treated for the following illness, and they are currently recovering and are well enough to return to school.

Began treatment on: ____ / ____ / ____ (YYYY/MM/DD)

Approved to attend school starting: ____ / ____ / ____ (YYYY/MM/DD)

○ Seal	Illness Name	Standard Period of Absence *Determined by a doctor based on these standards
	Measles	Three days after the fever breaks
	Whooping cough (pertussis)	Until the unique coughing stops or until 5 days of treatment with an appropriate antibiotic have been completed
	Mumps	Five days after swelling of the parotid gland, submandibular gland, or sublingual gland begins, and until the general condition improves
	Rubella	Until the rashes disappear
	Chicken pox (varicella)	Until all blisters are gone
	Tuberculosis	Until a physician decides there is no risk of contagion
	Pharyngoconjunctival fever	Until 2 days after main symptoms have disappeared
	Meningococcal meningitis	Until a physician decides there is no risk of contagion
	Enterohemorrhagic E. coli infection	Until a physician decides there is no risk of contagion
	Epidemic keratoconjunctivitis (pink eye)	Until a physician decides there is no risk of contagion
	Acute haemorrhagic conjunctivitis	Until a physician decides there is no risk of contagion
	Group A Streptococcus	At least 24 hours after first take antibiotics, and until all symptoms (such as fever and rash) disappear
	Viral hepatitis (type A)	Until liver functions return to normal
	Infectious gastroenteritis	Until vomiting and diarrhea symptoms have subsided, and entire physical condition returns to normal
	Mycoplasmal infection	Until the fever and cough subside
	Other contagious disease: (_____)	
For the following illnesses, students will stop attending school based on the instructions of their primary physician. If they do not need to stay home from school, you do not need to submit this form.		
	Infectious erythema	Because it is not contagious during breakouts, it is possible to attend school if general condition is good
	Herpangina	Possible to attend school if general condition has stabilized
	Hand, foot, and mouth disease	Possible to attend school if general condition has stabilized
	Contagious impetigo (empyema)	Possible to attend school if the area being treated can be covered. If it cannot be covered, wait until the scab falls off.

※Precautions for life at school: (_____)

◆ The procedure for the School Attendance Approval Certificate used in cases of seasonal influenza is now the “Influenza Treatment Report” form filled out by parents/guardians and submitted to the school. (Starting November 1st, 2018) If this child contracts another illness that could spread around school in addition to influenza, please write that your child also has influenza in the “Other contagious disease” space.
